

Team/project name

Team members

Include headshots of team members, relevant qualifications, and affiliations

What is the problem you are trying to solve?

- Is this one of the example problems or a new one?
- How did you establish/research the problem if it is new?

Outline of your solution

- Briefly outline the solution, include a sketch if helpful. Most of your pitch time will be spent on this component.

Plan for your solution

- For hardware: What is the bill of materials? What special equipment or supplies will you need access to? What is the lead time?
- For software: What is the schedule? What external services and platforms will you use? Do you need any hardware or infrastructure to deploy the solution?
- For chemicals: What are the constituent components? Where will they come from? Do you need access to special facilities for handling and/or testing?
- For all: What is the rough schedule and order of development?
